

territori, e come i risultati di questi interventi, realizzati nel rispetto e valorizzazione delle risorse locali, ancora si conservano stratificati nei paesaggi attuali.

Paesaggi piceni, romanizzazione, Firmum, Novana

ABSTRACT

We are presenting a concise comparative analysis of the results of the research which is being conducted by the University of Pisa in the valleys of the Tenna, Ete Vivo and Aso rivers, in the territories of Firmum and Novana, located in the present-day Comunanza. The data highlight the different ways in which the process of "Romanization" was carried out in these territories, and how the results of "Roman" interventions made with respect for, and the development of, local resources are still stratified in current landscapes.

Picenean landscapes, Romanization, Firmum, Novana

ADDENDUM

Mentre il presente contributo era in corso di stampa sono usciti due volumi di fondamentale importanza per gli studi sull'Italia centrale adriatica e per molte delle problematiche da noi trattate in questa sede:
